

PRESS RELEASE

Heidelberg Pharma reports on the results of the Annual General Meeting 2024

Ladenburg, Germany, 21 June 2024 – Heidelberg Pharma AG (FSE: HPHA) announced that the company's shareholders approved the following proposed resolutions of the management with a large majority (between 98,35% and 99,99%) at yesterday's ordinary virtual Annual General Meeting:

- Discharge of the members of the Management Board and the Supervisory Board for the fiscal year 2022/2023
- Appointment of the auditors and group auditors for fiscal year 2023/2024
- Cancellation of Authorised Capital 2022/I and creation of new Authorised Capital 2024/I with the option to exclude statutory subscription rights and corresponding amendments to the Articles of Association
- Approval of the remuneration report

Attendance (incl. postal votes cast) at the Annual General Meeting 2024 corresponded to 83,18% of the current capital stock.

About Heidelberg Pharma

Heidelberg Pharma develops novel drugs based on its ADC technologies for the targeted and highly effective treatment of cancer. ADCs are antibody-drug conjugates that combine the specificity of antibodies with the efficacy of toxins to fight cancer. Selected antibodies are loaded with cytotoxic compounds, the so-called payloads, that are transported into diseased cells. Inside the cells, the toxins then unleash their effect and kill the diseased cells.

Heidelberg Pharma is the first company to use the mushroom toxin Amanitin in cancer therapy by exploiting the toxin's biological mechanism of action with its innovative ATAC technology as a new therapeutic modality. It offers the opportunity to overcome resistance of cancer cells against therapeutic agents currently used and to eliminate dormant tumor cells, which typically survive current therapies and are responsible for tumor relapse and metastasis. This could lead to significant advances in cancer therapy - even for patients who no longer respond to any other treatment. The most advanced product candidate HDP-101 is a BCMA-ATAC for the indication multiple myeloma, which is currently in clinical development.

In addition to Amanitin, alternative payloads also expand the ADC platform technologies of Heidelberg Pharma to develop targeted and highly effective ADCs for the treatment of a variety of malignant hematologic and solid tumors.

Heidelberg Pharma AG is a biopharmaceutical company based in Ladenburg, Germany, and is listed on the Frankfurt Stock Exchange: ISIN DE000A11QVV0 / WKN A11QVV / Symbol HPHA. More information is available at www.heidelberg-pharma.com.

ATAC® is a registered trademark of Heidelberg Pharma Research GmbH.
