### **Heidelberg Pharma AG Announces Updated Guidance**

**Ladenburg, Germany, 6 October 2025** – Heidelberg Pharma AG (FSE: HPHA), a clinical stage biotech company developing innovative Antibody Drug Conjugates (ADCs), today announces that it has adjusted its guidance for the current fiscal year published on 21 March 2025, due to current focus and cost-saving measures.

The Heidelberg Pharma Group expects sales and other income for the financial year 2025 between EUR 7.5 million and EUR 9 million (previously: EUR 9 million to EUR 11 million). Operating expenses are expected to range between EUR 36 million and EUR 40 million (previously: EUR 40 million to EUR 45 million).

Based on these adjustments, an operating result (EBIT) between EUR -28.5 million and EUR -31 million is expected (previously: EUR -30 million to EUR -35 million).

As part of the strategic focus, long-term and short-term assets are still being reviewed for impairment. They could prove to be only partially or no longer recoverable, resulting in value adjustments. Such non-cash depreciation on assets would lead to additional operating expenses in the current fiscal year, which in turn could have a negative impact on the operating result beyond the aforementioned range of between EUR -28.5 million and EUR -31.0 million.

For 2025, Heidelberg Pharma anticipates cash requirements of EUR 14 million to EUR 17 million (previously: EUR 50 million to EUR 55 million anticipated inflow). Monthly cash consumption is expected to range between EUR 1.2 million and EUR 1.5 million per month (previously: EUR 4.2 million and EUR 4.6 million inflow). Based on current planning and available funds, the Company's financing is secured until mid-2026.

#### **About Heidelberg Pharma**

Heidelberg Pharma is a biopharmaceutical company working on a new treatment approach in oncology and developing novel drugs based on its ADC technologies for the targeted and highly effective treatment of cancer. ADCs are antibody-drug conjugates that combine the specificity of antibodies with the efficacy of toxins to fight cancer. Selected antibodies are loaded with cytotoxic compounds, the so-called payloads, that are transported into diseased cells. Inside the cells, the toxins then unleash their effect and kill the diseased cells.

Heidelberg Pharma is the first company to use the compound Amanitin from the green death cap mushroom in cancer therapy. The biological mechanism of action of the toxin represents a new therapeutic modality and is used as a compound in the Amanitin-based ADC technology, the so-called ATAC technology.

The lead candidate HDP-101 is a BCMA ATAC in clinical development for multiple myeloma. A second ATAC candidate, HDP-102, has recently started clinical development in Non-

Hodgkin Lymphoma and is currently on a temporary hold. HDP-103 against metastatic castration-resistant prostate cancer and HDP-104 targeting gastrointestinal tumors such as colorectal cancer have completed preclinical development. Heidelberg Pharma is open for partnering.

The company is based in Ladenburg, Germany, and is listed on the Frankfurt Stock Exchange: ISIN DE000A11QVV0 / WKN A11QVV / Symbol HPHA. More information is available at [www.heidelberg-pharma.com](http://www.heidelberg-pharma.com)

ATAC® is a registered trademark of Heidelberg Pharma Research GmbH.
